TECHNICAL SPECIFICATIONS

- Motor : 5,4 kW(L7e) - 48V.
- Position : Rear Transversal.
- Type : Separately excited electric DC motor with electronic power controller.
- Power (kW CEE) : 5,4Kw (L7) @ 2800 rpm.
- Torque (Nm) : 60 Nm at 0 rpm.
- Batteries : ODYSSEY PC1800FT • 12V-190A (4 elements). 5Hrs full charge.
- TPMLM: 1025kg.
- Payload: From 221kg. to 297kg. Depending version.
- Charger : Feeding 220V AC 16A 2200W.
- Transmissions : Driver Axle with electric change direction.
- Steering : Rack & pinion.
- Brakes : Double independent circuit (front-rear).
Front Discs Ø240mm - Rear Discs Ø227.5mm.
Mechanical parking brake on rear axel.
- Suspension : Overlapping triangles with combined spring and shock absorbers.
(Front/Rear) Levers pulled with torque limiter combined with shock-absorber and spring.
- Tyre : Road: Front 155/70R13, Rear 155/70R13
Off-Road: Front 145/80R13, Rear 145/80R13
- Max Speed : 45 km/h.
- Range* : Up to 50 km (Depending on temperature, weight, shape, grade, surface and driving conditions). Consult us.
